

Tigbauan Fundamental Learning Center, Inc.

TFLC School Management System (TFLC-SMS)

USER MANUAL

A guide for Administrators, Teachers, and Parents

Bachelor of Science in Information Technology

Capstone Project — 2026

Overview

The TFLC School Management System (TFLC-SMS) is a web-based application developed to streamline school operations at Tigbauan Fundamental Learning Center. It has two parts:

1. A login-protected Portal with dedicated sections for Administrators, Teachers, and Parents, covering student records, attendance, grades, inventory, and messaging.
2. A public Website that does not require a login, where visitors can view school announcements, the academic calendar, enrollment information, downloadable forms, the photo gallery, the staff directory, FAQs, and contact details.

System Requirements

- A modern web browser (Google Chrome, Microsoft Edge, or Firefox)
- A stable internet connection
- A valid user account (for Portal access only — the public Website needs no account)

Logging In (Portal)

3. Open the TFLC-SMS website and click **Portal Login** (or go directly to the login page).
4. Enter your username.
5. Enter your password.
6. Click **Log In**.

You will be taken to the Dashboard for your role automatically.

Administrator Guide

Dashboard

The Administrator Dashboard provides an overview of:

- Total Users (with an admin/teacher breakdown)
- Active Students
- Present Today (today's attendance count)
- Low Stock Items (inventory items at or below their reorder point)
- Unread Messages
- A weekly attendance chart and a user-roles distribution chart
- Quick links to Manage Students, Inventory, and Reports

Student Management

Add Student

7. Go to **Students**.
8. Fill in the Add New Student form (name, grade level, date of birth, gender, address, parent contact number, status, and an optional photo).
9. Click **Add Student**.

Edit Student

10. Click **Edit** on a student's card.
11. Update the information.
12. Click **Save**.

Update a Student's Photo

13. Click the camera icon on the student's card.
14. Choose a photo, then click the checkmark to save it.

Delete Student

15. Click **Delete** on the student's card.
16. Confirm the action. This cannot be undone.

User Management

From **Users**, the Administrator manages Admin, Teacher, and Parent accounts in one place:

- Add a new user (choose their role, set a username and initial password, add name/email/phone, optional photo)
- Edit a user's name, email, phone, or role
- Delete a user account

Note on passwords: there is currently no self-service "change password" option inside the Portal for any role. If a user forgets their password, the Administrator resets it directly using a provided database script (`reset_admin_password.sql`) or by updating the password in phpMyAdmin. A self-service password reset screen is a planned future improvement.

Assign Parent to Student

From **Assign Parent**, the Administrator links a Parent account to their child's student record, so that parent can see only their own child's attendance, grades, and messages after logging in.

Attendance Overview

Administrators do not mark attendance directly (that is done by Teachers). Administrators can:

- See today's attendance count and a weekly attendance chart on the Dashboard
- Export a full Attendance report, filterable by date range, from **Reports**

Grades & Subjects

From **Grades**, the Administrator can:

- Add or remove subjects per grade level
- View and filter every grade recorded by every teacher, school-wide, by grade level, quarter, and school year
- Export a Grades report to CSV

Inventory Management

From **Inventory**, the Administrator can:

- Add a new inventory item (name, category, starting quantity, minimum stock level, location)
- Update an item's quantity or minimum stock level
- Delete an item
- See Low Stock and Critical Stock indicators, automatically flagged when quantity falls at or below the minimum stock level

- Every add, update, and delete is automatically logged (who did it and when) in the inventory transaction history

Messages Overview

From **Messages**, the Administrator has a read-only view of every Teacher-Parent conversation in the system, searchable by sender, recipient, student, or message text. This supports school oversight of communication; the Administrator cannot send messages as another user.

Reports

From **Reports**, the Administrator can generate and export (as CSV/Excel) reports for:

- Students (masterlist)
- Attendance (filterable by date range)
- Grades (filterable by grade level, quarter, school year)
- Inventory Status
- Inventory Transactions

Reports can also be printed directly from the browser and saved as PDF using the browser's Print dialog.

Teacher Guide

Dashboard

The Teacher Dashboard displays a summary of the teacher's students, today's attendance status, and quick links to Attendance, Grades, and Messages.

Students

From **Students**, a teacher can:

- View the list of active students
- Open a student's full profile (background information and recent attendance history)
- Jump directly to Attendance or Messages for a specific student

Attendance

Record Attendance

17. Go to **Attendance**.
18. Mark each student as Present, Absent, Late, or Excused.
19. Click **Save Attendance**.

Attendance is recorded for the current date. Existing records for today reload automatically so they can be corrected without re-entering everything.

Grades

20. Go to **Grades**.
21. Select a grade level, subject, quarter, and school year.
22. Enter each student's grade (0–100). Existing grades for that subject/quarter load automatically.
23. Click **Save Grades**.

Messaging

From **Messages**, a teacher can:

- View all conversations with parents, grouped by parent/student
- Send a new message to a parent about a specific student
- See an unread-message count

Parent Guide

Dashboard

The Parent Dashboard shows a summary for the parent's linked children: number of active children, today's attendance, and unread message count, plus a quick view of one featured child's profile.

My Children

From **My Children**, a parent can:

- View each linked child's profile (grade level, gender, date of birth, enrollment status)
- Jump directly to that child's Attendance, Grades, or Messages

Attendance

From **Attendance**, a parent can select a child and view that child's attendance history and record status (Present/Absent/Late/Excused) by date.

Grades

From **Grades**, a parent can select a child and school year to view grades per subject and quarter, along with an automatically calculated quarterly average.

Messaging

From **Messages**, a parent can:

- Select their child's teacher and view the conversation history
- Send a new message about a specific child

Public Website (No Login Required)

Separate from the Portal, the public Website is where prospective and current families can find information without an account. It is reachable from the Login page and includes:

- **Home** — announcements highlights and quick links
- **Announcements** — school news, closures, and events, filterable by category, with pinned items shown first
- **Academic Calendar** — school year dates, exam schedules, holidays, and enrollment periods, grouped by month
- **Enrollment** — grade levels offered, enrollment requirements, enrollment schedule, and enrollment forms
- **Downloadable Forms** — enrollment forms, excuse letters, and permission slips, by category
- **Photo Gallery** — event and activity photos, organized by album
- **Staff Directory** — teacher and staff names, positions, subjects, and contact details
- **FAQ** — common parent questions, grouped by category
- **Contact** — office hours, phone, email, and address

All public Website content (announcements, calendar entries, forms, gallery photos, FAQs, and the staff directory) is managed by the Administrator from the corresponding pages in the Portal.

Logging Out

24. Click **Logout** at the bottom of the sidebar menu.
25. You will be returned to the Login page.

Troubleshooting

Issue	Solution
Unable to log in	Verify your username and password are typed correctly. If you still cannot log in, contact the Administrator.
Forgot password	There is no self-service reset yet — contact the Administrator, who can reset it for you directly.
A page shows an error or won't load	Refresh the page and check your internet connection. If the problem continues, note what you were doing and report it to the Administrator.
Unable to access a section of the Portal	Each account can only see the sections for its own role (Admin, Teacher, or Parent). Make sure you are logged in with the correct account.

Table 1 — Common Issues

Security Guidelines

- Keep your username and password confidential.
- Always log out after using a shared or public computer.
- Use a secure, trusted internet connection when possible.
- Report anything that looks suspicious (unexpected messages, unfamiliar activity) to the Administrator.

User Roles Summary

Role	Responsibilities
Administrator	Manage students, user accounts, inventory, grades/subjects, reports, and all public website content; oversee all messaging.
Teacher	Record attendance, encode grades, view assigned students, and message parents.
Parent	View their own child's attendance and grades, and message the child's teacher.
